Summary

Java Backend Engineer with 4+ years owning core-banking systems for Tier-1 South African banks as **Onsite Technical Lead**, from low-level design to production support. Building **Spring Boot**, **Kafka** and **GenAI (Azure OpenAI, RAG)** services.

Education

Pranveer Singh Institute of Technology

B.Tech in Electronics and Communication Engineering (GPA: 9.00)

Aug 2018 – Jun 2022

Kanpur, Uttar Pradesh

Experience

Tata Consultancy Services

System Engineer – Onsite Technical Lead, TCS BaNCS

Aug 2022 – Present

Johannesburg, South Africa

- Technical point of contact for business and architecture stakeholders across three Tier-1 South African banks; led the TCS BaNCS platform's first **cloud deployment**.
- **Lead an onsite-offshore development team**, driving requirement breakdown, **low-level design**, **code reviews**, coding standards, and mentoring junior engineers through delivery and production releases.
- Developed **Java 21/Spring Boot** backend modules for Corporate Actions processing, designing **REST APIs** and **JPA/Hibernate** data layers with **Oracle**, transaction management, exception handling, and **JUnit 5/Mockito** unit and integration testing.
- Architected and developed **event-driven Kafka microservices** using Spring Boot for an Electronic Voting System and Email Notification Platform, processing real-time Corporate Actions with **idempotent consumers**, **retry** and **dead-letter handling**, schema evolution, and zero-downtime deployments.
- Engineered high-availability Tax Management interfaces and **Spring Batch** jobs using Java, **ExecutorService-based multithreading**, and **Oracle SQL optimization/indexing** to speed up reconciliation and API responses.
- Engineered **Azure OpenAI** integration with Java, Kafka, Spring Batch, and **AWS SQS** to deliver AI-powered Corporate Actions notifications for **50,000+ customers**, eliminating manual notification drafting.
- Drive production engineering for **SWIFT**, **ISO 20022**, and **DTCC**-compliant systems, leading **P1/P2 RCA**, **JVM diagnostics**, permanent code fixes, and **Jenkins CI/CD** automation to improve production stability; recognized with 2 On-the-Spot Awards.

Capgemini

Software Engineer Intern

Dec 2021 – Jul 2022

Mumbai, India

- Developed Bank Management System modules and **RESTful APIs** (Java, Spring Boot, PostgreSQL, MongoDB); containerised deployments with **Docker** and **Kubernetes** on **AWS**; wrote JUnit/Mockito tests.

Projects

SentinelFlow – GenAI Fraud Detection Platform | Java 21, Spring Boot, Kafka, PostgreSQL, Redis, Azure OpenAI, React

- Architected **Spring Boot microservices** for real-time fraud scoring over an event-driven **Kafka** pipeline with the **Outbox pattern**, idempotent producers, **Redis Lua rate limiting** and **Resilience4j** circuit breakers at **sub-20 ms p99**.
- Engineered a **RAG** fraud-explanation service using **pgvector embeddings**, **Azure OpenAI GPT-4o** and **Redis semantic caching**, streamed via SSE to a **React/TypeScript** dashboard; CI with **GitHub Actions**, Testcontainers and Gatling.

Technical Skills

Languages: Java 21 (Collections, Streams, Multithreading & Concurrency, JVM & GC Tuning), SQL, TypeScript, Python

Backend & Architecture: Spring Boot, Spring Security (OAuth2, JWT), Spring Cloud (API Gateway), Spring Batch, Hibernate/JPA, RESTful APIs, Microservices, Event-Driven Architecture, Saga & Outbox Patterns, Distributed Transactions, Design Patterns, Low-Level Design, System Design

Generative AI: Azure OpenAI (GPT-4o), LLM Integration, RAG, Embeddings, Vector Search (pgvector), Semantic Caching

Messaging & Data: Apache Kafka, AWS SQS, PostgreSQL, Oracle DB, MongoDB, Redis, SQL Tuning & Indexing

Cloud & DevOps: AWS (EC2, S3, RDS), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git, Maven, Linux

Frontend: React, TypeScript, HTML/CSS

Reliability & Testing: Resilience4j, JUnit 5, Mockito, Testcontainers, Postman, Prometheus, Grafana

Domain: TCS BaNCS, Corporate Actions, SWIFT, ISO 20022, DTCC, Payments, Reconciliation, Production Support, Agile
